### ***Examiner's Statement of Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The prior art of record does not, alone or in combination, disclose a body with two magnetic tracks extending essentially in parallel with one another, wherein, at specified intervals along the movement coordinate, a first of the magnetic tracks exhibits magnetized sections in which the magnetic north poles are aligned so as to be at least largely coincident in a magnetization direction that is essentially at right-angles to the surface of the body; and at intervals specified to coincide with the other intervals, the second of the magnetic tracks exhibits magnetized sections in which the magnetic south poles are aligned so as to be at least largely coincident in the magnetization direction, and a magnetized section of one of the magnetic tracks is located at least largely centrally in relation to a gap between two magnetized sections of the other magnetic track, with a magnetoresistive sensor arranged above the magnetic tracks, for determining the directions of magnetic fields.

### ***Conclusion***
